FOR IMMEDIATE RELEASE

DRiWATER MARKETING BY RAIN BIRD EUROPE A SUCCESS

Rain Bird Europe's marketing efforts of RB-IS have proven worthwhile

Santa Rosa, CA – February 17, 2005 -- DriWater, Inc., the worldwide manufacturer of DRiWATER, time-release water, is pleased to report that Board of Directors members Glenn Smith, Joseph Paternoster, and Eric McLaughlin have returned from Southern France where meetings with Rain Bird Europe were held.

“The market for DRiWATER in Europe is more developed in the vacation watering area. Our product fits both in price and function. The initial sell through numbers are better than we had expected. The Rain Bird group is doing a fantastic job,” said Eric McLaughlin.

The DRiWATER product will be sold under the Rain Bird label. In the U.S., the product is called ‘RB-IS’. In France it will be called ‘AQUADOS’, and in Spain it will be called ‘AQUADOSIS’.

Glenn Smith of DriWater, Inc. said, “It was amazing to see the diversity of products being sold as a solution for watering plants while on vacation. Most of the products that are currently on the market are expensive, cumbersome, and difficult to use. DRiWATER overcomes these obstacles and should be a huge success in the retail marketplace.”

DriWater, Inc. has shipped 4 containers overseas with orders for 2 containers per month for the rollout. Our expectation is to have \$1 million in sales for 2005.

DriWater, Inc. has developed the commercial and retail market for DRiWATER in the United States and is working in more than 30 countries around the world. DRiWATER is making the lives of homeowners, travelers, and vacationers much easier. The product is also turning deserts into forests, growing food where it was never possible, and is conserving one of Earth’s most precious resources – water.
