FOR IMMEDIATE RELEASE

DRiWATER MARKETING BY RAIN BIRD Australia A SUCCESS
Rain Bird Australia's marketing efforts of RB-IS have proven worthwhile

Santa Rosa, CA – May 3, 2006-- DriWater, Inc., the worldwide manufacturer of DRiWATER, time-release water, is pleased to report that DriWater, Inc and Rain Bird Australia have signed an exclusive marketing and distribution agreement to market the DRiWATER technology in Australia.

“Australia is in the middle of an eight year drought that has placed a premium on the value of water,” said Joe Paternoster, President and CEO of DriWater, Inc. “DRiWATER is the most efficient way to use water and therefore the product had immediate recognition.”

The kickoff for DRiWATER was at the Irrigation Australia trade show in Brisbane. Rain Bird Australia hosted the stand where RB-IS was displayed. The product drew much attention for its efficient water use and as a cost effective solution to projects that require labor.

Just north of Manly, there was a meeting with a potential customer to plant 6 million trees in one project. “Our technology fits perfectly on this type of project, we will save money and water for the community,” said Joe Paternoster.

Rain Bird Australia will take its first order for the retail and professional markets immediately. Initially, Rain Bird Australia will place RB-IS in the largest nurseries in Melbourne and expand the program across the country. Additionally, they will use their existing distribution network to service the professional market.

DriWater, Inc. has developed the commercial and retail market for DRiWATER in the United States and is working in more than 30 countries around the world. DRiWATER is making the lives of homeowners, travelers, and vacationers much easier. The product is also turning deserts into forests, growing food where it was never possible, and is conserving one of Earth's most precious resources – water.
